How much does a 30m² solar PV system cost?

A residential property in an urban region of South Africa installs a 30m² solar PV system featuring mid-range monocrystalline panels. The solar panel cost per square meter, including all labor and system components, is approximately \$6,000.

How much does a solar panel cost per m²?

Global cost per m² in 2025 varied immensely across regions because of labor, logistics, and policy support. In the United States, a typical solar panel cost per square meter in residential installations is between \$280-\$320 per m²; because labor and permission expenses are higher.

What is solar energy per square meter?

Solar energy per square meter is the quantity of sunlight energy (or irradiance) that reaches a one square meter surface region over a specific time period. It is generally measured in watts per square meter (W/m²), and there are variations across several factors like the geographical site, time of the year, and local weather situations.

How much does a solar panel cost per watt?

Let's use a polycrystalline panel as an example. An average polycrystalline panel offers 160 watts per m² for \$140. Thus, the cost per watt for that panel is \$0.87. A high-efficiency PERC panel may offer 200 watts for an area of \$180, thus accounting for about \$0.90 per watt.
