## 20-foot folding containers for oil refineries

What is a 20ft shipping container?

Explore why Boxhub's 20ft shipping containers are the ideal storage solution for compact spaces. 20ft containers are designed to carry small volumes of heavy cargo, such as machinery, cement and steel. These qualities make them ideal for the storage of large items--like farming and construction equipment--or for re-use as the frame of a modular home.

How do I choose a 20ft container?

Choose a 20ft used container. If you're looking for a box to transform into a container office, home, or pool, we recommend purchasing a new 20ft container. 20ft new containers, also known as "one-trips", have been used once before being sold for non-shipping purposes.

Should I buy a used 20ft shipping container?

If you're looking for a budget-friendly container for static storage purposes, we recommend purchasing a used 20ft shipping container. Used 20ft containers have been retired by the world's shipping lines after around 15-20 years of use.

Are 20ft containers weatherproof?

Used 20ft containers have been retired by the world's shipping lines after around 15-20 years of use. While they can no longer be stacked on a cargo ship, they are still guaranteed to be weatherproof, with doors and floors that function properly. Looking for a cost-effective alternative to renting a storage unit or building a shed?

Tank containers series mainly used for transportation and storage of chemical liquid products and oil products, because it can be stack up placed, so that, widely used in ware house, and other ...
