
40-foot folding container used at drilling site

What is a seafold 40 HC container?

SeaFold 40' has the same features as a conventional 40' HC container. Requires no special handling or maintenance equipment. Safe and easy folding and erecting procedure. Compatible with all standard lift equipment found in most ports and terminals. Serviceable by existing maintenance organizations and depots throughout the world.

What is a seafold container?

In maritime operations, SeaFold containers deliver substantial cost savings for one-way cargo shipments through more efficient loading and unloading procedures. Their design allows for additional stowage space on mainline and feeder vessels, which in turn reduces the vessel's time in port.

What is an offshore container?

These containers are used to transport goods, equipment, and personnel to offshore drilling rigs, oil and gas platforms, and other offshore facilities. The DNV2.7-1 standard covers all aspects of offshore container design and construction, including materials, welding, corrosion protection, and structural integrity.
