## 60V Inverter Retrofit

What is a retrofit inverter in a photovoltaic system?

The retrofit inverters only manage the storage systems and are mainly used in existing photovoltaic systems to keep the system configuration unchanged. In this case, the retrofit inverter of the storage system and the photovoltaic inverter are two distinct machines where the power of the storage is added to the power of the photovoltaic.

What is an AC-coupled battery storage retrofit inverter?

As an AC-coupled battery storage retrofit inverter, it can effectively upgrade an existing single-phase or three-phase on-grid PV system into an energy storage system by adding a battery. Max. Continuous Charging / Discharging Current (A)
