
60kW Off-Grid Solar Container Customized

What is a 20kW off-grid Solar System?

A 20kW off-grid solar system includes solar panels, off-grid solar inverter and solar batteries. Since this solar system comes with solar batteries, you can store excess solar energy to be used later on when required. Solar battery will help you to run your connected load very smoothly.

How does a 40kW off-grid solar system work?

A 40kW off-grid solar system works entirely on solar electricity; whether it is morning or the night. This 40kW solar system has solar batteries for backup. In first priority solar power will run connected load and 2nd priority solar batteries will run connected load.

Why should you choose a modular solar power container?

Go big with our modular design for easy additional solar power capacity. Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean, renewable solar energy.

Why should you choose a solar storage container?

Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean, renewable solar energy. Lower energy/maintenance costs ensure operational savings.
