
60kWh Folding Container for Wastewater Treatment Plants

What is a containerised portable waste water treatment plant?

A containerised portable waste water treatment plant gives clients the option to relocate it onsite or easily transport it to new sites as necessary. In addition to that, the systems are modular so that they can work together in a variety of combinations effectively dealing with variable waste water volumes to achieve any effluent quality.

What is an intelligent containerised waste water treatment plant?

Intelligent containerised waste water treatment plants are ready to use immediately on delivery. A containerised portable waste water treatment plant gives clients the option to relocate it onsite or easily transport it to new sites as necessary.

What is a water treatment container?

The container is insulated and equipped with door-in-door, light, and air-conditioning. The container includes the following plants: This customer needed to upgrade the existing water treatment plant, but no free space at site was available. Mobile water treatment in a container was the solution of choice.

What is a containerized water purification system?

By choosing pre-designed, module-sized plants, fully assembled in standard 20-ft and 40-ft containers with the option for a 10-ft as well, the complexity and construction of building water purification systems are no longer necessary. Containerized water treatment systems are shipped out to where the potable water is needed.
