
Abu Dhabi Energy Storage New Energy BESS

Will Dubai's new solar power plant be able to operate 24/7?

The facility will be capable of operating 24/7 on renewable energy. This will also be the world's first 24/7 solar PV, battery storage gigascale project, according to Abu Dhabi Future Energy Company (Masdar) and Emirates Water and Electricity Company (EWEC), which are part of the project.

Why is EWEC deploying Bess in Abu Dhabi?

EWEC is deploying Bess to enhance the flexibility and stability of Abu Dhabi's energy network, allowing for the effective management of peak demand and integration of increasing amounts of renewable energy," the utility said in a media statement on 25 July.

How many GW of baseload power can a Bess project deliver?

The project will be capable of delivering up to 1 GW of baseload power 24 hours a day, setting a global benchmark for the development of clean energy. CATL, as preferred supplier for the BESS, will provide its latest TENER technology for the total capacity of 19 GWh.

What is EWEC's new energy storage facility?

The planned facility is expected to provide up to 800 megawatt-hours (MWh) of storage capacity. Called Bess 1, the project will closely follow the model of EWEC's independent power project (IPP) programme, in which developers enter into a long-term energy storage agreement (ESA) with EWEC as the sole procurer.
