
Angola DC Uninterruptible Power Supply Company

What is alternative power solutions in the East African region?

Our aspiration is to provide alternative power solutions in the East African Region. We provide unique specialized services tailored to meet the requirements of the region in terms of Solar, Wind Powered Equipment, Uninterruptible Power Supply (UPS) as well as Power Backup Systems.

What is a continuous power supply (UPS)?

UPS is the short version of "uninterruptible power supply". In many applications a continuous power supply is important because power fluctuations and outages can cause damage to control equipment as well as unexpected down time. This situation can lead to a loss of productivity and revenue.

How does an uninterruptible power supply work?

The uninterruptible power supplies have e.g. an adjustable maximum buffer time to protect the battery and the unit protects the battery from going into a deep discharge. Draining the battery all the way down can damage it in a very short period of time, especially if this occurs multiple times.
