Are pgr-8800 and afr-4 arc flash protection relays suitable?

To meet the requirement for comprehensive monitoring of 24 arc flash sensors across multiple switchgear panels, we have identified the PGR-8800 and AFR-4 arc flash protection relays as suitable solutions.

What is afr-4 arc flash protection?

This AFR-4 arc flash protection solution is a decentralized, independent protection system. Each AFR-4 arc flash relay operates autonomously, with its tripping logic and relay outputs. If an arc-flash fault occurs in a zone, only the AFR-4 in that zone will immediately issue a trip command, opening the circuit breaker in its assigned zone.

Are arc flash and arc-flash studies a safety concern?

Arc-flash and arc-flash studies are also clarified. This White Paper also highlights a safety concern when HV/MV switchgear fails catastrophically, particularly oil-filled switchgear assembly. Within IEC Standards, HV switchgear are used on systems above 1 kV up to 52 kV. In North America MV is any voltage between 600 V and 69 kV.
