
Battery Cabinet Operation Specifications

What is included in the Battery Cabinet Manual?

This manual contains important instructions that should be followed during installation and operation of the battery cabinet. This product is designed for commercial / industrial use only, with UPS systems. It is not intended for use with life support and other designated critical devices.

What temperature is the battery cabinet rated for?

The battery cabinet is rated for operation in up to a 40°C (104°F) ambient temperature. The batteries are rated for a 25°C (77°F) ambient temperature to extend their useful life. It is recommended for optimal battery life and discharge performance to keep the ambient air temperature the battery is used in at 25°C (77°F).

What are the safety requirements for a battery cabinet?

The battery cabinet must be properly earthed/grounded and due to a high leakage current, the earthing/grounding conductor must be connected first. Failure to follow these instructions will result in death or serious injury. Battery Safety DANGER

What are the battery cabinet external wiring requirements?

The battery cabinet external wiring requirements are shown in Tables D and E. NOTE 1: All specified wire sizes are 90 C rated copper minimum. NOTE 2: Replace with same type and number of original battery. Mixing battery letter designation and or sizes will damage equipment and void warranty.
