How do you dismantle a shipping container?

Stabilise the shipping container so that it does not move while dismantling. Containers are often anchored to flatbeds to ensure they stay intact in their position. The doors should be opened, and locks and hinges should be removed. The doors can then be dismantled using a reciprocating saw to cut along their hinges.

How do I remove container station from ZFS?

To remove Container Station and any data stored in the ZFS dataset, use the following steps: Go to App Center. Remove Container Station. Go to Control Panel and navigate to Privilege > Shared Folders > Shared Folder. Select and remove Container Station shared folder. By default, the Container Station shared folder is named Container.

Prognosis not good. I don't think you can "move" a storage module without deconstructing it and rebuilding it, which loses all the wares. That said, I don't think that wares ...
