# China solar power to battery in Lithuania

Why did Lithuania block solar power companies from China?

VILNIUS - Lithuanian lawmakers on Tuesday blocked companies from China and other countries posing a threat to national security from getting access to the control systems of solar and wind farm and batteries larger than 100 kW and being able to remotely control them.

Can Chinese manufacturers access a power supply in Lithuania?

With China included on the list, the law prohibits Chinese manufacturers from accessing systems they supply in Lithuania, preventing them from remotely managing power parameters or turning devices on or off.

How many solar farms are there in Lithuania?

The changes will enter into force on May 1, 2025. According to the ministry, there are currently more than 1,000 solar and wind farms larger than 100 kW in Lithuania and there are also several batteries of the same capacity, and some of their control systems are Chinese-made and remote-controlled.

Why did Lithuania tighten its cybersecurity laws?

Lithuania has decided to tighten its cybersecurity laws, banning manufacturers from countries deemed national security threats, including China, from remotely accessing management systems of solar, wind, and storage facilities. The European Solar Manufacturing Council has backed the move. Lithuania's parliament
