
Container house covered with solar panels

What is a 40 ft container home with solar panels?

The 40' Off Grid Container Home with Solar Panels is designed to be versatile and customizable. You can use it as a cozy home, a vacation home, a backyard office, or anything in between. Its modular design allows you to add more containers to expand your living space. The home also has large windows to provide ample natural light and ventilation.

What is a 40' off grid container home with solar panels?

The solar panels provide power for your lighting, appliances, and heating needs. You can also collect rainwater for your needs, which makes this home an ideal choice for those who want to live sustainably and self-sufficiently. Learn more about the specs of your 40' off grid container home with solar panels below:

Can you put solar panels on a container?

We put solar panels on a container for a guy who was powering an RV on his land. He had a generator, and the container was full of batteries to support himself. When we're on top of a container, we need to build a custom racking system to hold up more than one row of panels, which is what we ended up doing for him. (See in image with tan container.)

What is a solar container?

Our Solar Containers are designed in a way to maximize ease of operation. It's not only meant to transport PVs but also to unfold them on site. It is based on a 20' sea container. The efficient hydraulic system helps quickly prepare the Solar to work. Because of their construction, our containers offer unmatched flexibility and mobility.
