
Current solar module export market

Where do solar PV exports come from?

The latest monthly solar PV export data from the world's largest exporter, China, by country or region of destination. Ember China solar export dataset provides the following information: The IEA has stated that China's solar photovoltaic exports account for 80% of the global market.

How many solar cells did China Export in 2024?

Chinese cell and module exports grew in 2024, according to customs data. Image: Trina Solar. China exported 7.79 billion solar cells in 2024, a year-on-year increase of 38.2%, according to the latest data from Chinese customs.

What is the Ember China solar export dataset?

Ember China solar export dataset provides the following information: The IEA has stated that China's solar photovoltaic exports account for 80% of the global market. Ember's China solar exports dataset is sourced from the General Administration of Customs of the People's Republic of China (GACC): Data is available from 2017 to present.

Does China still dominate the global solar PV module market?

China continues its dominance of the global solar PV module market. Declining costs of PV module production have made solar installations more affordable globally. Source: [abriendomundo/Shutterstock.com](#).

Ember Energy says China's solar export market is shifting as more diverse global supply chains drive higher cell and wafer shipments, lifting combined solar product capacity ...

Solar Module is exported to over 140 countries worldwide, with United States, India, and Ukraine being the principal importers. Collectively, these three countries consume ...

China's total module exports reached 61.9 GW in 1Q25, down 8% YoY from 67.62 GW. In March 2025, the top five single-country markets importing Chinese modules were, in ...

As global demand for renewable energy surges, the photovoltaic module export industry has become a cornerstone of international trade. This article explores key market drivers, ...

Europe remains the largest export market for PV modules, but its market share has significantly declined. Besides Europe, South Asia, Latin America, and the Middle East ...

The global solar photovoltaic (PV) module market has been growing at pace and is projected to rise to \$133.12bn in market value by 2028, according to Power Technology 's ...
