## Czech power station generator

How many hydropower plants are there in the Czech Republic?

In the Czech Republic and Turkey, CEZ has around 40 hydropower plants with a total installed capacity of 2,267 MW. All of the large hydroelectric power stations, except the Dalesice, Mohelno and Dlouhá Stránská, are situated at the Vltava River where they form a cascade system called the Vltava Cascade.

How will the Czech government support new generating stations?

The support of new generating stations will also depend upon compliance with the Czech national action plan. 3.4.2 The Czech Promoted Energy Sources Act provides, inter alia, that subsidies paid to generating station operators will be predominantly in the form of green bonuses, and the repayment period for investments is 15 years.

Who owns a coal-fired generating station in the Czech Republic?

Several producers including EP Energy, Sokolovská uhelná, Litvínovská uhelná, Alpiq, and Dalkia, also own and operate coal-fired generating stations in the Czech Republic with a total installed capacity exceeding 300 MW. A list of entities holding electricity generation licences is available on the ERO's website 2 .

Does the Czech Republic use nuclear power?

The Czech Republic uses nuclear power for 34% of its electricity. In addition to maintaining and upgrading its existing units, the country has plans for new gigawatt units, initially at Dukovany, and also for up to 3 GW of small modular reactor capacity.
