
Demand for energy storage in Uzbekistan

Does Uzbekistan need energy storage?

By 2030, Uzbekistan aims to source over 40% of its electricity from renewables, demonstrating its commitment to sustainability. The plan also includes advancing energy storage, with a 300 MW lithium-ion system debuting in 2024 and a goal of 4.2 GW storage capacity by 2030. [The Role of Energy Storage in Renewable Energy](#)

How is Uzbekistan transforming its energy sector?

Uzbekistan is rapidly transforming its energy sector with a focus on renewable energy to reduce reliance on fossil fuels. Since 2021, the country has added 10 new renewable plants, including nine solar and one wind facility, with a total capacity exceeding 2,500 MW, alongside over 2,200 MW from hydroelectric plants.

Why is Uzbekistan halting natural gas exports?

Driven by rapidly increasing domestic energy demand, Uzbekistan has shifted from being an energy exporter to an importer since 2020. As a result, the government has planned to halt natural gas exports to meet the country's needs.

Why is Uzbekistan becoming an energy importer?

This shift reflects Uzbekistan's transition from an energy exporter to an energy importer. Uzbekistan's move toward greater reliance on energy imports became evident in specific sectors. The country became a net importer of coal in 2012, oil products by 2018, and electricity in 2019.

The country faces challenges in balancing power demand and supply due to its rigid energy system. [Strengthening regional energy integration and enabling multilateral energy ...](#)

1. Current installed capacity - As of the beginning of 2025, the total capacity of energy storage systems in Uzbekistan is approximately 1.8 gigawatt-hours (GWh), mainly ...

A. Sector Performance, Problems, and Opportunities Sector overview. A reliable and adequate electricity supply is essential to sustained economic growth and development. ...

Uzbekistan represents one of the most dynamic and strategically crucial emerging markets for Battery Energy Storage Systems (BESS) in the Caspian and Central Asian region. ...

As Uzbekistan continues to modernize its energy infrastructure, there is a growing demand for reliable and efficient energy storage solutions, creating a favorable environment for companies ...

Uzbekistan advanced its national energy transition with the inauguration of the Nur Bukhara solar and battery storage project, the first utility scale facility of its kind in the country.

Moreover, the two SVPs will represent the largest combined solar and BESS capacity in Uzbekistan and even across the region, according to the EBRD. The deployment of ...

Uzbekistan's energy transition is accelerating, driven by a bold vision to integrate renewable energy and modernize its aging grid. At the heart of this transformation is Masdar's ...

By 2030, Uzbekistan aims to source over 40% of its electricity from renewables, demonstrating its commitment to sustainability. The plan also includes advancing energy ...

Uzbekistan is expected to have one of the fastest growing storage markets in the world in the coming years
Government has set target of 4.2GW of storage by 2030 Attractive ...
