
EK backup uninterruptible power supply

What is an uninterruptible power supply (UPS)?

An uninterruptible power supply (UPS) offers guaranteed power protection for connected electronics. When power is interrupted, or fluctuates outside safe levels, a UPS will instantly provide clean battery backup power and surge protection for plugged-in, sensitive equipment.

What is a UPS battery backup?

When power is interrupted, or fluctuates outside safe levels, a UPS will instantly provide clean battery backup power and surge protection for plugged-in, sensitive equipment. APC, our flagship brand, offers UPS options for computers, peripherals, networks, servers, as well as data centres, and facilities. Need help choosing a UPS battery backup?

How do I select the ups power?

It is recommended to select the UPS power based on 1.5% of the required load to ensure optimal performance. Please note that this product is not suitable for use with TV, induction cooker, refrigerator, electric tools, electric kettle, and other inductive load equipment.
