
Earth leakage breaker factory in Latvia

How does an earth leakage circuit breaker work?

Our earth leakage circuit breaker is generally composed of a ZCT (Zero-phase-sequence Current Transformer) + Earth leakage relay + Circuit breaker. The ZCT detects earth leakage current, notifies the electronic circuit, and shuts off the circuit using an internal tripping device.

What is an earth leakage circuit (ELC)?

An Earth Leakage Circuit (ELC), also known as an Earth Leakage Circuit Breaker (ELCB) or Residual Current Device (RCD), is a crucial electrical safety device designed to protect people and property from electrical faults and the risk of electric shock.

What is earth leakage circuit breaker (MCB)?

MCB is a fundamental protection device used to restrict the current & fault within a circuit. The earth leakage circuit breaker works on the principles of current balancing which means it computes the net of inward current as well as outgoing current.

What is a medium sensitivity earth leakage circuit breaker (ELCB)?

A medium-sensitivity Earth Leakage Circuit Breaker (ELCB) is an electrical safety device designed to detect and respond to ground faults or leakage currents with a moderate sensitivity threshold.
