# Energy Storage New Energy Factory

When is Tesla Shanghai energy storage megafactory launching production?

Tesla Shanghai energy storage Megafactory launches production on February 11. Photo: courtesy of Tesla. Tesla held a ceremony on Tuesday to mark the production launch of its Megapack energy storage plant in Shanghai's Lingang New Area, meaning Tesla's China operations has entered a new phase, the Global Times has learned.

What is Tesla's new energy storage Gigafactory?

Tesla's new energy storage Gigafactory in Shanghai marks a significant expansion in the company's global operations, aligning with Tesla's ongoing growth strategy in the energy sector.

How big is the energy storage factory?

The energy storage factory covers an area of approximately 200,000 square meters, which is equivalent to the size of 30 standard soccer fields. It initially plans to produce 10,000 Megapack units a year, with a storage capacity of nearly 40 GWh.

What is Tesla's new energy storage plant in China?

The facility, first announced in April 2023, marks Tesla's continued expansion in China, the world's largest electric vehicle and energy storage market. Located in Shanghai's Lingang Free Trade Zone, the plant aims to bolster global energy storage capacity by producing 10,000 Megapacks annually, equivalent to 40 GWh of energy storage.

The gigafactory focuses on the production of the Megapack, a large-scale energy storage system for the global market. According to Tesla, the factory will have an annual ...

Tesla is set to shake up the energy storage world with its new Gigafactory in Shanghai nearing completion. Slated to start production by Q1 2025, this facility promises to ...
