
Estonian distributed energy storage cabinet manufacturer

Why did Eesti Energia invest in a battery storage facility?

The investment in the battery storage facility will help Eesti Energia increase the use of electricity produced from renewable energy sources, while ensuring more stable prices for end users. Auvere BESS. Photo by Jarek Jõepera

Why is Eesti Energia building a storage facility in Auvere?

22. Nov 2024 Eesti Energia is building the company's first large-scale storage facility in the Auvere industrial complex to balance the fluctuations in electricity prices resulting from the growth of renewable energy production and to support the stability of the electricity system.

Will Estonia leave the Russian electricity grid in February 2025?

Estonia and the other Baltic states plan to leave the Russian electricity grid and connect to the Continental European electricity system in February 2025. This step means that the Baltic states will no longer be able to use the support from the Russian grid, which has helped stabilize the electricity system so far.
