# Guyana environmental project uses mobile energy storage containers for bidirectional charging

Can bidirectional electric vehicles be used as mobile battery storage?

Bidirectional electric vehicles (EV) employed as mobile battery storage can add resilience benefits and demand-response capabilities to a site's building infrastructure.

What is a Bess & how will it impact Guyana?

The arrival of the BESS follows the earlier delivery of two gas turbines, each capable of generating 45 megawatts of electricity. Together, these components are expected to enhance the reliability of Guyana's national grid, reduce carbon emissions, and support the delivery of more affordable electricity.

What are the development directions for mobile energy storage technologies?

Development directions in mobile energy storage technologies are envisioned. Carbon neutrality calls for renewable energies, and the efficient use of renewable energies requires energy storage mediums that enable the storage of excess energy and reuse after spatiotemporal reallocation.

Can bidirectional EVs be used as mobile storage?

In contrast to stationary storage and generation which must stay at a selected site, bidirectional EVs employed as mobile storage can be mobilized to a site prior to planned outages or arrive shortly after an unexpected power outage to supplement local generation or serve as an emergency reserve.

LNDCH4, the U.S. joint venture building an integrated natural gas processing facility at Wales, announced on Friday the arrival of a 30-megawatt backup battery energy ...

The "Rainforest Battery" - Not Just a Catchy Nickname Guyana's project isn't just about storing energy--it's about harnessing chaos. With 87% forest cover and rivers that ...

Introducing DENIOS™ Energy Storage Cabinet, explicitly tailored for Lithium-Ion batteries, now available in larger sizes for expanded storage capacity. Engineered to ensure secure ...

Bidirectional electric vehicles employed as mobile batteries can be mobilized to a site prior to planned outages or arrive shortly after an unexpected power outage to supplement ...

Energy storage configuration for Guyana's new energy project With a total capacity of 30 megawatts (MW), the system was shipped in twenty-two (22) containers which comprises of ...

Compared with traditional energy storage technologies, mobile energy storage technologies have the merits of low cost and high energy conversion efficiency, can be flexibly ...

The Guyana Energy Agency (GEA) has installed six electric vehicle (EV) charging stations at various locations for public use. Prime Minister Brigadier (Ret'd) Mark Phillips on Wednesday ...

This latest delivery joins the growing list of critical components already received for the project, including two state-of-the-art gas turbines, each capable of generating 45MW of ...

Georgetown, Guyana. June 13, 2025 - LNDCH4 Guyana is pleased to announce the arrival of the Backup Battery Storage System (BESS), which landed at the John ...
