
Havana has several base stations with 100KWh

What happened to Cuba's power plant?

The situation came to a head on Friday, when Cuba's largest power plant malfunctioned, joining several smaller plants already offline. Foul weather had also stalled the arrival of fuel from tanker ships offshore, starving the island's power plants. The combination prompted the entire grid to collapse.

Does Cuba still have power after Hurricane Ian?

Yes. Following the passage of Hurricane Ian in September 2022, Cuba's grid collapsed, leaving the entire country without power for several days. Authorities eventually re-established service, but not before protests broke out in various cities across the island, including Havana.

What happened to Cuba's electricity grid?

REUTERS/Norlys Perez HAVANA - Cuba's national grid collapsed on Friday, leaving the entire population of 10 million people without electricity and underscoring the precarious state of the Communist-run country's infrastructure and economy. Restoration of service is under way but long-term challenges will remain.

How does Cuba get its power?

Cuba gets its power from large thermoelectric plants like Antonio Guiteras and some smaller ones, which run on crude oil. While the island produces about half of its own crude oil, it must import the remainder, which can be difficult -- and costly -- due to U.S. sanctions.
