
How to install solar energy outdoors

How to install solar panels?

The first step in solar panel installation is fixing the mounting structure to support the panels. The whole mounting structure must be tilted and have an angle between 15 to 20 degrees to have maximum sunlight exposure. For countries in the Northern Hemisphere, the best direction to face solar panels is south because it gets maximum sunlight.

How do you install a solar panel racking system?

Mount the solar panel racking system securely, ensuring proper alignment and leveling. Install the panels on the rails, connecting them carefully. Finally, set up the inverter and complete the electrical connections. Throughout the process, prioritize safety and comply with local regulations.

How do I choose a solar system for my home?
