# How to use outdoor communication power supply BESS

Do I need backup power for a Bess auxiliary load?

For certain projects, backup power must be provided for the BESS auxiliary load as required by the BESS supplier or fire codes. Some BESS suppliers mandate uninterrupted power to maintain the operation of thermal management systems, ensuring battery temperatures remain within desired limits to minimize degradation.

Does Bess require uninterrupted power?

Some BESS suppliers mandate uninterrupted power to maintain the operation of thermal management systems, ensuring battery temperatures remain within desired limits to minimize degradation. BESS fire safety standards, such as NFPA 855, outline minimum requirements for backup power for fire safety systems.

How does a Bess work?

A Battery Energy Storage System (BESS), such as those offered by FusionSolar, works by storing energy in a rechargeable battery and releasing it back into the power grid during peak demand or when renewable energy sources are low. This process involves an inverter and sophisticated control software.
