What is a 21700 battery?

A 21700 battery is a high-capacity, rechargeable lithium-ion cell designed for superior energy efficiency and performance. With a standard size of 21mm in diameter and 70mm in length, these batteries were developed as a next-generation improvement over 18650 cells, offering increased power output, extended runtime, and higher energy density.

Are 21700 batteries safe?

Unprotected 21700 batteries: Lack built-in safety features and are generally used in battery packs with external battery management systems (BMS). 21700 batteries are widely used in: Electric vehicles, with companies like Tesla and other manufacturers using them in battery packs for improved energy storage and performance.

Why is a 21700 cell a good choice?

The larger size of the 21700 cell enables it to store more energy, making it ideal for applications requiring high power capacity, such as electric vehicles and industrial battery packs. Its dimensions also contribute to better thermal management, ensuring safer and more efficient operation.

Where can I get more wholesale 21700 Li-ion batteries?

To get more wholesale 21700 li-ion cells, just contact Sunpower New Energy. Sunpower New Energy manufactures high-quality lithium-ion 21700 batteries, with UL, CB, and UN38.3 certifications. MOQ=2.

If you require batteries for a high-temperature environment, Sunpower lithium ion 21700 battery will be your best choice. Featuring superior anti-swelling performance and stability, the 21700 ...
