
Lifepo4 power station factory in indonesia

How much money will Indonesia invest in LFP cathode project?

The total investment in the project amounts to USD 350 million, with projected annual revenues of USD 1.2 billion from exports to the Americas, Europe, and Asia. Luhut highlighted that this collaboration will establish Indonesia as a leader in LFP cathode production outside China.

Will Indonesia become a leader in LFP cathode production outside China?

Luhut highlighted that this collaboration will establish Indonesia as a leader in LFP cathode production outside China. The factory, with an annual production capacity of 120,000 tons by the end of 2025, will supply batteries for at least 3 million EVs worldwide.

What is Indonesia lithium source?

Indonesia Lithium Source is the first overseas base project of Changzhou Liyuan and is also the world's first overseas production base of lithium iron phosphate anode materials with a scale of 10,000 tons.

What is Indonesia's electric vehicle ecosystem?

This milestone further strengthens Indonesia's electric vehicle (EV) ecosystem. Cathodes, along with anodes and electrolytes, are key components of lithium batteries. Earlier, President Joko Widodo inaugurated an anode factory at the same SEZ in August 2024.
