
Lithium power station factory in Argentina

Will Argentina start a lithium battery factory in Latin America?

(Image: Mariano Garcia /Alamy) Argentina will start operations at the first lithium battery cell factory in Latin America before the end of the year. The country aims to boost its position in the region's electric transport and energy storage markets, and go beyond simply producing the lithium that is critical to their growth.

Could a new lithium plant add value to Argentina's lithium industry?

A worker at a lithium plant in the Salinas Grandes salt flat in northern Argentina. The country's lithium production is rising, and a new battery plant will be one of the first facilities to process the metal domestically, with hopes of adding value to its industry. (Image: Mariano Garcia /Alamy)

What is the Rincon Lithium Project?

The Rincon lithium project is a large, low-cost lithium-brine asset located in the heart of the 'lithium triangle' in Argentina. The project will be a valuable source of rapidly produced, high-quality lithium for the global energy transition, according to the details on Rio Tinto's website.

Where does lithium come from in Argentina?

A satellite view of lithium extraction at the Cauchari-Olaroz plant, Jujuy province. According to Argentina's mining ministry, 42% of the country's lithium production in 2022 was exported to China, the world leader in electric vehicle manufacturing.

Argentina capitalizes on its lithium boom with 74,600 tons produced in 2024, attracting billions in foreign investment from Rio Tinto and Eramet. Discover how this "new ...

This provincial autonomy, in turn, makes Argentina's lithium much more investment-friendly than its neighbors, especially Chile; while Chile considers lithium a ...
