
Low voltage inverter cabinet control power supply

What is a power switch & protection frequency inverter cabinet?

1. The power switch and protection frequency inverter cabinet are equipped with low-voltage MCCB which is connected to the power line, in addition to complete and disconnect the circuit, can protect the circuit and VFD short circuit and overload protection. can cut off the power during maintenance . 2.

What is frequency inverter?

Frequency inverter is a dedicated accessory of inverter cabinet, the variable frequency control the speed and the main technical parameters depends on the specification of built-in inverter and external configuration. Inverter cabinet have big difference according to the use of different application and different functions.

What equipment can be installed inside the control cabinet?

According to the needs of the operating conditions, we can install AC input reactor, output reactor, DC reactor, EMI filter, braking unit, braking resistor, contactor, intermediate relay, thermal relay, PLC, GOT , Electricity meter , cooling fan and etc inside the control cabinet.

What is the difference between inverter control motor and traditional control motor?

Inverter control motor compared with the traditional control of the motor, energy conservation is the most practical significance, you can achieve energy-saving effect. The traditional motor are consists of three parts: initial purchase cost, maintenance cost, and energy cost. The Energy costs account for about 77% of the motor's operating costs.
