
Manila Solar Container 10MW

Does Manila Water have a solar project?

In a report by Business World, Manila Water announced the signing of a power purchase agreement with MSpectrum for the Phase 2 solar project, which will cover 10 facilities. Construction is set to begin in the first quarter of 2025, with the facilities expected to generate 6.2 million kilowatt-hours (kWh) of electricity annually upon completion.

Where in the Philippines will a solar power plant be located?

The project, which is strategically located on the Philippines' main island of Luzon, about 100km from Manila, will combine 3.5GWp of solar PV capacity with 4.5GWh of battery energy storage system (BESS).

Who owns 100% of Solar Philippines?

The transaction with Solar Philippines New Energy Corporation, which currently owns 100% of the project, was announced at a signing ceremony in Pasig City, Philippines, attended by Torbjorn Caesar, Chairman and Senior Partner at Actis, Manuel V. Pangilinan, Chairman of Meralco, and Emmanuel V. Rubio, CEO of Meralco PowerGen (MGen).

What is the impact of a solar power project in the Philippines?

The project has strong sustainability credentials, notably because of its impact in decarbonising the Philippines' energy system (SDG7), but also by generating power to support economic development (SDG8), creating more than 10,000 new jobs (SDG8), and facilitating local development (SDGs3+4).

The Terra Solar Project will provide electricity to circa 2.4 million Philippine households² The transaction represents the largest foreign direct investment for a greenfield ...

Manila Water, in partnership with renewable energy solutions provider MSpectrum, has completed the physical installation of an additional 3.8 megawatts-peak (MWp) of solar ...

Manila Water Co., Inc. has partnered with MSpectrum, Inc., MERALCO's solar energy subsidiary, to install 4.27 megawatt-peak (MWp) solar power systems across its ...

With its unprecedented scale and forward-thinking design, the MTerra Solar Project is a cornerstone in the Philippines' clean energy transition. Its Solar PV-BESS hybrid ...

Manila Water, in partnership with MSpectrum, has completed the installation of 3.8 megawatts-peak (MWp) of solar capacity across ten of its facilities.
