# New Energy Storage Grid Access

Will Tesla's first grid-side energy storage station be built in China?

It will be Tesla's first grid-side energy storage station to be built on the Chinese mainland. Dong Kun, general manager of Tesla China's energy business, said the station, once launched, will participate in electricity spot trading, helping balance peak and off-peak power demand in the local grids and enhance grid stability.

What is new energy access?

New energy access is the basis for constructing public charging and swapping stations.

How can Smart Grid technology improve public charging & swapping stations?

In addition, with the development of smart grid technology, new energy access, energy storage configuration, and topology design for public charging and swapping stations should also incorporate intelligent elements.

Does new energy access have advantages?

This paper profoundly studies the new energy access, storage configuration, and public charging and swapping station topology. Analysis shows that new energy access has significant advantages.
