# New regulations for energy storage batteries

What is the new battery regulation?

This regulation entered into force on February 18, 2024, and will fully replace the previous Battery Directive by August 2025. It applies to all batteries sold in the EU, including industrial batteries used in energy storage systems. Substance restrictions: Limits on hazardous materials such as mercury, cadmium, and lead.

What are battery safety requirements?

These include performance and durability requirements for industrial batteries, electric vehicle (EV) batteries, and light means of transport (LMT) batteries; safety standards for stationary battery energy storage systems (SBESS); and information requirements on SOH and expected lifetime.

Does the battery regulation apply to all types of batteries?

The Battery Regulation applies to all categories of batteries, regardless of cell chemistry.

What is the new EU Battery regulation?

In addition, the CO2 footprint will be mandatory. Batteries must meet safety and performance requirements in order to comply with the EU's high quality and durability standards. The new EU Battery Regulation brings changes for all companies involved in the battery life cycle.

The most important facts in brief The Battery Regulation applies to all categories of batteries, regardless of cell chemistry. Whether electric vehicle (EV) batteries, batteries in light ...

The Commission would assess the feasibility of phasing out non-rechargeable portable batteries of general use by the end of 2030; a new obligation of battery replaceability ...

As these regulations gain momentum, they are not just shaping the future of battery sustainability but also redefining energy storage and mobility as we know it. The future ...

Discover the evolving policies and regulations of the European Union and United Kingdom, with both issuing landmark legislation in the energy storage.

Battery technology is widely applied in both portable and stationary energy storage. However, the widespread use of batteries also results in significant damage to resources and ...

The latest EU Regulations for Battery Energy Storage Systems (BESS). Learn about compliance, CE marking, Battery Passport, EPR, and safety standards for 2026.

Home battery storage is a cornerstone of modern energy independence. As more households adopt this technology, the European Union is implementing comprehensive ...

The first set of regulation requirements under the EU Battery Regulation 2023/1542 will come into effect on 18 August 2024. These include performance and durability ...

The new EU Battery Regulation represents a significant shift in the way batteries are manufactured, imported, distributed, and managed, particularly for the solar energy ...
