Do you need an off-grid inverter in 2025?

If you're going off the grid in 2025, you're going to need a reliable inverter to make it all work. Off-grid inverters are the heart of a solar energy system, converting DC power from solar panels or batteries into usable AC power for your home or business.

What is an on-grid inverter?

An on-grid inverter, also known as a grid-tie or grid-connected inverter, is generally used with an on-grid solar system. It automatically sends the excess electricity generated by the solar system into the utility grid via a bi-directional meter. The entire export/import process is known as net-metering.
