
Oslo invests in wind power storage project

Will Norsk Hydro build a 84 GWh pumped storage project?

(Photo: Narrativ/Hydro) Norsk Hydro, a Norwegian aluminum and renewable energy company, is planning a 84 GWh pumped storage project in Luster Municipality, Norway. The Illvatn project, with an estimated price tag of NOK 1.2 billion (US\$ 113 million), is expected to begin construction in 2025, targeting 2028 or 2029 for full operation.

Could offshore wind projects boost Norway's offshore wind capacity?

Arctic offshore wind projects: Norway is also exploring the potential for offshore wind in the Arctic, where wind conditions are particularly favorable. Projects in the Barents Sea are being studied for their viability, and if successful, they could provide a significant boost to Norway's offshore wind capacity.

Does Norway have a wind energy sector?

Norway's wind energy sector has been steadily growing, with both onshore and offshore projects gaining momentum. As the country moves toward achieving its ambitious climate goals, wind power--particularly offshore and floating wind--has become a cornerstone of its renewable energy strategy. Installed capacity and growth

Can wind power help Norway decarbonize its energy system?

Green hydrogen and wind power: Norway is exploring the integration of wind energy with green hydrogen production, particularly in offshore wind projects. This could provide a solution for storing and transporting renewable energy, further advancing the country's efforts to decarbonize its energy system.

Hydro has announced plans to construct a new pumped storage power plant in Luster Municipality, Norway. Construction is set to commence in 2025, with operations ...

84 GWh pumped storage project planned for Norway Norsk Hydro, a Norwegian aluminum and renewable energy company, is planning a 84 GWh pumped storage project in Luster ...

Norwegian onshore wind power, no data is available. However, according to real terms data from 2021, there was an increase in capital expenditure for new installations compared Total (net) ...

In May 2022, the City of Oslo and Oslo Hafslund Celsio made an agreement to finance carbon capture and storage (CCS). The project is set to receive NOK 3 billion in support from the ...

Norwegian aluminium company Norsk Hydro ASA (OSE:NHY) has made the decision to invest NOK 2.5 billion (USD 249m/EUR 214m) to build a pumped storage power ...

Why Oslo's Mega-Project Matters (and Why You Should Care) Let's face it - when a city drops 13 billion USD on energy storage, the world sits up. Oslo, Norway's capital, just ...

Norsk Hydro, a Norwegian aluminum and renewable energy company, is planning an 84GWh pumped storage project in Luster Municipality, Norway. The Illvatn project, with an ...

You know how people say solar and wind power are too unpredictable? Well, Oslo's new 150-meter deep storage shafts might've just cracked the code. As of March 2025, ...
