# Outdoor Wireless Base Station Consultation

Why should you choose TP-Link outdoor wireless base station?

With its centralized management platform and high degree of flexibility, it is the ideal choice for providing point-to-point, point-to-multipoint, and outdoor Wi-Fi coverage. The TP-LINK Outdoor Wireless Base Station pairs professional performance with user-friendly design, making it the perfect solution for both business and home users.

How to optimize base station deployment in 5G wireless networks?

In previous research on 5G wireless networks, the optimization of base station deployment primarily relied on human expertise, simulation software, and algorithmic optimization.

How many users are connected to a base station?

Fig. 9 indicates that the six base stations have established connections with the majority of nearby users. Specifically, base stations 1 to 6 are connected to 474, 324, 463, 494, 687, and 377 users respectively. Due to building obstructions, 162 users were unable to connect to any base stations.

What is a candidate site for a new ground-based station?

To simplify the presentation, we designate candidate sites for new ground-based stations as numbers 1-316, existing ground-based stations as 317-318, existing rooftop stations as 319-320, and new rooftop stations as 321-551. In a complex 3D outdoor environment, approximately 2-8 stations are required to achieve coverage.

Solution Description Based on the integrated base station developed by LX2160A, SageRAN adopts the integrated design method of 5G BBU and RRU. Based on the ...
