
Outdoor enterprise wireless base station recommendation

Is TP-Link a good wireless base station?

TP-LINK's 5GHz 300Mbps * Outdoor Wireless Base Station is specifically designed to provide an effective solution for outdoor wireless networking applications. With its centralized management platform and high degree of flexibility, it is the ideal choice for providing point-to-point, point-to-multipoint, and outdoor Wi-Fi coverage.

What is enterprise wireless?

For governments and industries such as transportation and energy,our enterprise wireless provides purpose-built mobile communicationsupported by 4G/5G base stations,microwave,and core network products. We build end-to-end and reliable high-speed data channels to facilitate our customers" production and speed up their digital upgrade.

What is the difference between a wireless base station and a microwave base station?

Wireless base stations are widely distributed, and the backhaul network requires high quality. The wired transmission of base stations requires high construction costs, long construction period, and high O&M costs. Microwave transmission is fast in network construction and provides a carrier-class availability of up to 99.999%.

Does wbs510 work with TP-Link?

Two external RP-SMA antenna interfaces allow the Outdoor Wireless Base Station to integrate seamlessly with TP-LINK"s line of sector and dish antennas. Where long- distance wireless data transmission is necessary,the WBS510 can be paired with a TP-LINK dish antenna,allowing it to transfer data over distances of up to 50 km *.
