# Philippines Energy Storage Project

Where is the first battery-based energy storage facility in the Philippines?

The plant, which will be the first battery-based energy storage facility in the Philippines, will be located next to the Masinloc power plant in Zambales. The energy storage array will enhance grid reliability by providing fast response ancillary services like frequency regulation.

Where in the Philippines will a solar power plant be located?

The project, which is strategically located on the Philippines' main island of Luzon, about 100km from Manila, will combine 3.5GWp of solar PV capacity with 4.5GWh of battery energy storage system (BESS).

What is the energy secure Philippines project?

Through the Energy Secure Philippines Project, the U.S. will work with Philippine government and private sector partners to improve the performance and efficiency of energy utilities, deploy renewable energy systems, enhance competition in the power sector, and address energy sector cybersecurity.

What is the impact of a solar power project in the Philippines?

The project has strong sustainability credentials, notably because of its impact in decarbonising the Philippines' energy system (SDG7), but also by generating power to support economic development (SDG8), creating more than 10,000 new jobs (SDG8), and facilitating local development (SDGs3+4).

[Philippines, 12 December 2025] Vena Energy, the renewable energy arm of Vena Group and a leading provider of green energy solutions across the Asia-Pacific region, today ...

SolisStorage has officially launched its EverCore Commercial and Industrial (C& I) energy storage system in the Philippines, marking a new step in the country's clean energy ...

DUMAGUETE CITY - First Gen-Energy Development Corporation has installed a 10-megawatt battery energy storage system at its geothermal power plant in Valencia, Negros ...

Philippines Solar-Storage Project Commissioning Progresses Smoothly into New Phase. Driven by the global energy transition and the need for power grid upgrades in Southeast Asia.

The growth of Philippines energy storage capacity is a key theme at industry events like Solar & Storage Live Philippines 2025. EcoSolar Energy's BESS project in Capiz ...

Aboitiz Power commits P1.2B to a pioneering hybrid BESS project in the Philippines. This model, integrating battery storage into thermal plants, is a blueprint for climate-resilient ...

Jinko ESS has successfully delivered a 5.96MWh energy storage system (ESS) to a flagship industrial project in Puro, Aroroy, Masbate, in the Philippines. This full-capacity ...

The Department of Energy (DOE) of the Philippines endorsed 17 power generation projects to the National Grid Corporation of the Philippines (NGCP) in June 2025, highlighting ...

The grid-scale energy storage market in the Philippines was a topic of discussion at the Energy Storage Summit Asia 2024 last month, put on by our publisher Solar Media. A ...

Meralco PowerGen Corporation (MGEN) is set to develop a 49-megawatt (MW) Battery Energy Storage System (BESS) in Toledo, Cebu, which is part of a broader effort to ...

---

The project, which is strategically located on the Philippines' main island of Luzon, about 100km from Manila, will combine 3.5GWp of solar PV capacity with 4.5GWh of battery ...
