What is a portable power station?

What Are Portable Power Stations? A portable power station is a small battery storage generator that can be charged and provides power where and when you need it. This makes them good off-grid power sources when you need backup power during a power outage, are heading into the wilderness, or are working remotely on a job site.

Can a portable power station be turned into a solar generator?

Using DJI's solar panels, you can turn your portable power station into a solar generator. This setup provides all the unlimited energy the sun has to offer, without the noise, pollution or recurring fuel payments associated with a traditional generator.
