
Price of solar curtain wall in Australian shopping malls

What is a photovoltaic curtain wall?

Building Integrated Photovoltaics At Onyx Solar we provide tailor-made photovoltaic glass in terms of size, shape, transparency, and color for any curtain wall design. Photovoltaic curtain walls transform any building into a self-sufficient energy infrastructure and enhance the building's architectural design.

Why are Australian businesses using commercial solar?

As energy prices continue to climb, more Australian businesses are turning to commercial solar as a smart, cost-saving solution. Designed to meet the higher electricity demands of offices, warehouses, and industrial sites, commercial solar systems generate clean energy on-site, helping reduce power bills and environmental impact.

How much does a commercial solar system cost?

Commercial solar prices vary by size and state. For 2025, a 10kW system costs \$12,000-\$18,000; a 30kW system \$25,000-\$45,000; a 100kW system \$80,000-\$150,000. Incentives can reduce these costs by several thousand dollars depending on your location and system size.
