
Reset circuit breaker factory in Nepal

Why should you choose kuoyuh push to reset circuit breakers?

KUOYUH push to reset circuit breakers is designed for optimal protection against overloads. Choose from a wide range of push to reset thermal circuit breakers, certified by global standards, for various applications. Ensure safety with our trip free breakers.

Are kuoyuh circuit breaker certified?

KUOYUH's circuit breaker is certified by IEC, UL/CUL (USA), CSA (Canada), CCC (China), TUV (Europe), KC (Korea), SAA (Australia), etc. As well, UL1500 Ignition Protection Certification certified, and obtained RoHS environmental protection certification.

How do you open a breaker panel?

Open the breaker panel lid with one hand. Never touch the breaker panel with two hands at once, or you could create a circuit with your body that allows current to pass through. Instead, reach out with just your dominant hand and release the latch on the breaker panel lid.

How do you turn off a breaker?

Never touch the breaker panel with both hands at once. Turn off every breaker one by one. Use your thumb and index finger to flip the top left breaker switch all the way to the "off" side, then work your way down to the switch below it and so forth. Keep going until you have flipped every switch to the "off" position.
