What are rooftop solar panels?

Rooftop solar panels are a revolutionary way to harness the power of the sun and generate clean, renewable energy right from the comfort of your home or business. These innovative systems consist of an array of solar panels strategically installed on the roof, ready to capture the sun's rays and convert them into electricity.

What are the different types of rooftop solar PV systems?

The three main types of rooftop solar PV systems are off-grid rooftop solar systems, on-grid rooftop solar systems and hybrid solar systems (grid-tied with battery). Off-grid rooftop solar systems include a solar battery to store excess energy, so owners have backup power during periods of low sun.
