
Solar panels in rural areas of the UK

Is the UK a good place for solar panel use?

Contrary to popular belief, the UK has more than enough sunlight to power solar panels. It receives the same amount of solar energy as certain areas in France or Spain, which are known for their Mediterranean climate.

How many homes in the UK have solar panels?

Approximately half a million homes in the UK have solar panels installed (as of the end of 2013), and each week an additional 1900 are reportedly added. Most people asked about green energy technologies would probably mention solar panels and wind farms.

Which areas are most likely to have solar panels?

Fewer flats: Areas with fewer flats are much more likely to have solar panels. Rural location: Rural locations appear to be more likely to have solar panels compared to urban areas. Age: Areas with a more residents older than 65 are more likely to have solar panels on their homes.

Does Northern Ireland have solar panels?

Overall, Northern Ireland has a much lower density of solar panels than other areas of the UK. Only two areas are above the UK average of 208 solar panel installations per 10,000 people. But this could change in future. In May 2023, the UK Government introduced a 0% VAT rate on solar panel installations in Northern Ireland.

The Briefing, titled "Agri-PV: how solar enables the clean energy transition in rural areas" outlines the synergies that exist between the objectives of key objectives of the ...
