## Solar powered portable outlet in Panama

Do I need a power adapter in Panama?

If your devices are compatible with these specifications, you will not need a power adapter. However, if your devices use a different plug type or are not compatible with the voltage in Panama, you will need a power adapter and/or a voltage converter/transformer.

What is the standard voltage for a power socket in Panama?

All power sockets in Panama provide a standard voltage of 110V with a standard frequency of 60Hz. You can use all your equipment in Panama if the outlet voltage in your own country is between 100V-127V. This is mostly the case in the US, Canada and countries in South America. The standard frequency in Panama is 60Hz.

Can I connect my laptop charger to an electrical outlet in Panama?

Yes, you can connect your laptop charger to an electrical outlet in Panama as long as the outlet is compatible with the charger's voltage and plug type. In Panama, the standard voltage is 110V and the standard frequency is 60Hz.

What type of plugs are used in Panama?

Plugs for Panama are: Type A: A two-prong plug with two flat parallel pins. There is no earth connection. It is sometimes called the "NEMA connector". Type B: A three-prong plug with two flat parallel pins and a grounding pin. The grounding pin is longer than the other two so that the device is grounded before the power is connected.

Most portable solar power systems -- aka solar generators, power stations, portable power banks or battery boxes -- can be charged via solar panels, a wall plug or a 12-volt car outlet. [pdf]
