## Solar water pump placed outdoors

What is a solar water pump outdoor?

The POPOSOAP Solar Water Pump Outdoor stands out as an ideal choice for eco-conscious gardeners seeking efficient irrigation solutions. With a robust 30-watt solar panel, it boasts a maximum flow rate of 430 GPH, elevating water up to 8.5 feet. Weighing only 4.55 pounds, its compact design is easy to install--just place it in sunlight.

How to install a solar-powered water pump?

Installing a solar-powered water pump can be a hassle-free experience if you consider a few key factors. Many pumps come with a plug-and-play design, letting you set them up quickly without complicated electrical work. Pay attention to the cable length, as longer cables offer flexibility for positioning the solar panel and pump effectively.

Why do you need a solar well pump?

Human and animal drinking water: Provide clean, healthy water for your family and livestock. Domestic water supply: Enjoy reliable water access in off-grid or remote areas. Solar well pumps are used in a wide range of scenarios, such as agricultural irrigation, residential water supply, and off-grid locations.

How to choose a solar water pump system?

First, you should confirm whether the solar water pump system is direct feed or with Tank System. You can refer to the below two diagram to calculate the pump head. In practice, we normally choose the pump head 10%-20% higher than the actual demand in order to make sure the pump can work properly.
