
Southern European company develops energy storage project

Where does SSE Renewables operate?

SSE Renewables operates across the United Kingdom, Ireland, Continental Europe, and Japan. ENGIE UK is a utility company and Independent Power Producer (IPP) specializing in renewable energy generation, flexible energy storage, and energy supply solutions for businesses.

What is the European energy storage inventory?

The Commission's European Energy Storage Inventory can help address this gap within Europe. Launched in March 2025, it is the first European-level tool of its kind, providing a real-time dashboard of energy storage levels in Europe, offering energy storage data across a full range of technologies.

Who will build PGE's battery energy storage system?

PGE has picked LG Energy Solution as general contractor for the battery energy storage system (BESS) project, which will be built at the site of the firm's pumped hydro facility in Zarnowiec, southern Poland, pictured above.

Who is SSE Renewables?

SSE Renewables is a leading renewable energy company specializing in onshore wind, offshore wind, hydro, solar and battery technologies, with a growing presence internationally. Part of the FTSE-listed SSE plc, the company is focused on the development, operation, and construction of renewable energy assets.

While renewable energy sources can't be depleted in the same way as fossil fuels, they are 'variable', meaning their availability fluctuates. That's where energy storage solutions, ...

EDP Renewables has started the construction of its first stand-alone battery energy storage (BESS) project in Europe, a milestone that materializes the company's ...

PGE has picked LG Energy Solution as general contractor for the battery energy storage system (BESS) project, which will be built at the site of the firm's pumped hydro facility ...

DRI, a division of the Ukraine-based DTEK group, has made significant progress on its 133 MW battery storage project in Trzebinia, Poland, by acquiring full ownership from ...

An appropriate deployment of energy storage technologies is of primary importance for the transition towards an energy system. For that reason, this database has been created as a ...

Explore how Europe's BESS landscape is transforming with significant developments in battery storage capacity. Learn about the key players and countries leading ...

Amsterdam, September 30, 2025 - Sungrow, global leading PV inverter and energy storage system (ESS) provider, today announced the successful grid connection of the first 400MWh ...

Samsung C&T E&C Group has signed an MoU with Synthos Green Energy to support SMR development in Poland and Central and Eastern Europe, expanding its role as a key ...

TotalEnergies develops battery-based energy storage solutions, which are essential complements to renewable energies, mainly in Europe and the United States.

During an exclusive interview with Energia Estrategica at Genera 2025, the company's Regional Director for Southern Europe outlined why this is a decisive moment for ...

Observers and stakeholders alike will undoubtedly watch with keen interest as this project develops, serving as a benchmark for future initiatives within the burgeoning realm of ...

DRI, the EU renewables arm of Ukrainian private energy group DTEK, has completed the acquisition of a 133-MW/532-MWh battery energy storage system (BESS) ...

A decisive step for grid stability, technological innovation and the national energy transition Hyperion's first battery storage projects in Portugal, located in Estremoz and Évora. ...
