What are Eaton supercapacitors?

Eaton supercapacitors are high reliability, high power, ultra-high capacitance energy storage devices utilizing electric double layer capacitor (EDLC) construction combined with proprietary materials and processes.

What makes a super capacitor different from a normal capacitor?

Supercapacitors (SCs) are different from normal capacitors due to their exceptional electrochemical properties, excellent charge-discharge cycles, high charging-discharging rate, better lifespan, high specific power density, and high energy density .

What is a supercapacitor?

The type of supercapacitor (SC) is determined by the material used to fabricate the electrode. Generally, if carbon-based material is used, it falls into the category of electric double-layer capacitor (EDLC). For Transition metal oxides, MXene, MOFs or conducting polymers, etc., it falls into the pseudocapacitance category.
