# UAE Dubai 2025 solar Energy Storage Policy

How much solar power will the UAE have by 2032?

In the region, we have gone from 10 megawatts (MW) of solar photovoltaic power in the UAE in 2009 to over 60 gigawatts (GW) by 2032 from announced projects across all six Gulf countries. The UAE made a bet on this transition. Our leaders recognised that the times called for new thinking on energy, and that we had much to gain by being its champion.

What is the UAE Energy Strategy 2050?

Given the recent dynamic changes in the energy sector, the maturity of emerging low-emission energy technologies, and the country's commitment to the objectives of the Paris Agreement, the UAE Energy Strategy 2050 was updated, setting goals for 2030 and ambitions for 2050 to reach net zero.

Will UAE achieve net zero by 2050?

In the first phase, which runs till 2030, the strategy aims to: achieve financial saving of AED 100 billion and mobilise investments between AED 150 and 200 billion by 2030 to ensure the energy demand is met and to sustain economic growth in the UAE. The picture below highlights the UAE's journey to achieve net zero by 2050

Is 2023 a year of sustainability?

The move aligns with the declaration of H. H. Sheikh Mohamed bin Zayed Al Nahyan marking 2023 as the Year of Sustainability, under the theme 'Today for Tomorrow'. Updates in the UAE Energy Strategy 2050

The UAE energy storage market is being driven by the 'twin engines' of 'sovereign capital + technology openness' to restructure the Middle ...

Explore Dubai's leading solar and energy storage developments in 2025, featuring major projects, events, and technologies shaping the UAE's sustainable energy future.

With the eyes of the world still on the UAE following its hosting of COP28 in Dubai, the message is clear: the country intends to remain at the forefront of sustainable development ...

Dubai, UAE - April 8, 2025 - Intersolar & ees Middle East 2025, the premier event for the solar and energy storage industries in the MENA region, ...

From an operational perspective, the integration of photovoltaic solar energy with advanced battery storage addresses the challenges of renewable energy intermittency. The ...

The UAE's clean energy capacity is projected to surpass 22 gigawatts by 2031 through new renewable projects. The Mohammed bin Rashid Al Maktoum Solar Park's target ...

In 2025, DEWA's solar strategy pivots to massive energy storage and a 7,260 MW target. Uncover the analysis behind Dubai's gigawatt-scale ambitions now.

The first phase of the solar park, which incorporates both ground-mounted solar and concentrated solar power technologies, was commissioned in October 2013.

NET ZERO MEA - Solar & Energy Storage Summit is the region's premier gathering of solar energy leaders, policymakers, and investors, dedicated to accelerating the transition to a more ...

---

The solar park's low electricity costs, with bids as low as 1.35 U.S. cents per kilowatt-hour, rival those of fossil fuels, proving that clean energy can be economically ...

Solar & Storage Live Middle East is the region's solar and energy storage exhibition that celebrates the technologies at the forefront of the transition ...

The UAE Energy Strategy 2050 aims to triple the contribution of the renewable energy and invest AED 150 to AED 200 billion by 2030 to meet the country's increasing demand for energy as a ...

The Mohammed bin Rashid Al Maktoum Solar Park - Molten Salt Thermal Energy Storage System is a 600,000kW molten salt thermal storage energy storage project located in ...

DEWA is expanding the Mohammed bin Rashid Al Maktoum Solar Park with 800 MW of new capacity by 2025. Get the latest UAE solar energy news on this major clean ...
