What is uninterrupted power supply?

The task of uninterrupted power supply is to gain time for a regular shutdown of energy consumers and save data. In the event of a prolonged failure of the main network, the uninterruptible power supply system (SGE) maintains the supply of electricity to the pantographs by autostarting the diesel generator set (DGU) and switching the load to it.

Should you install an uninterruptible power supply system?

Installing an uninterruptible power supply system is advisable during short-term power outages and power surges, but the capacity of the UPS batteries is not enough for long-term operation of the equipment in the absence of a centralized power supply.
