
Uninterruptible power supply costs in Denmark

Why did electricity prices decrease in Denmark in 2023?

The electricity prices in the two Danish bidding zones decreased significantly in 2023. This was caused by a combination of decreasing price of gas and low European electricity demand. The price of electricity fell by a total of 60.3 pct. in DK1 and 61.3 pct. in DK2.

What was the wholesale electricity price in Denmark in October 2022?

In October 2022, the wholesale electricity price in Denmark was 137.08 euros. Statistics reveal that this price is around 21% higher compared to the price that was prevalent in the same month a year earlier.

How does Dur monitor the retail Electricity market in Denmark?

DUR has focus areas that are determined annually for the monitoring of the retail electricity market in Denmark. In 2023, DUR monitored whether electricity suppliers had been reporting and updating to the price comparison tool, elpris.dk, continuously and correctly.

How do I find the most affordable electricity supplier in Denmark?

To find out which electricity supplier is the most affordable, you can check the Danish Utility Regulator-operated website Elpris.dk. That will enable you to compare electricity prices across different suppliers in Denmark, which will help you find an affordable supplier. The good news is that you can change your electricity supply company.
