
Uninterruptible power supply for Minsk computer room

What is an uninterruptible power supply for server room use?

An uninterruptible power supply for server room use is a backup power solution that kicks in instantly when the main power source fails or fluctuates. It bridges the gap between a power outage and the switchover to a backup generator or safe shutdown.

What is an uninterruptible power supply?

This ensures an uninterrupted, clean, and stable power supply with zero transfer time. Because of this, it's considered the gold standard for an uninterruptible power supply for server room environments that require 24/7 uptime, such as data centers, hospitals, financial institutions, and any operation that cannot afford a second of downtime.
