
Uzbekistan Folding Container High-Pressure Type

What is an upright folding container?

An upright folding container is a type of container with hinged long sides in the middle and hinged short sides at the base. In its folded and upright state, the upper frame remains rigid, providing the necessary stability. This type of container is commonly used in the retail sector.

What is an open side container?

It can become completely open sides, resulting in a much wider loading area. This flexibility allows for simple loading and unloading of large items that won't fit through standard doors. For businesses looking to optimize their use of space, open-side containers provide efficient storage solutions for bulky items.

What is an open top container?

Open-top containers have a convertible top that you can remove entirely to make an open-top container. Thus, this open-top container can ship materials of any height quickly. What I like the MOST about the OPEN TOP container is its features for removing and putting the top cover. It is A FLEXIBLE feature.

What is a dry storage container?

Dry storage containers can be completely enclosed, waterproof, and protected from the elements. It is because of their hard top, sides, and floor. Besides, some of them have changes to the features. The purpose is to carry certain kinds of dry or liquid bulk cargo.
